

Manual for Double-Stacking with LS50C filter at LS50THa telescope

Take the following steps, if you want to use the double-stack filter:

- first go with your manual for the Lunt Solar Systems LS50THa telescope and tune it.
- carefully screw the double-stack filter into the front thread of the solar telescope.
- look thru your telescope and tune the double-stack filter.

It can happen that you will see the following picture in your eyepiece, after you have your double-stack filter screwed on. Then you just have to tune your double-stack filter to move the sun reflexes out of your field of view.

Now you should be able to see much more details on the sun's surface, because with the double-stack filter you observe with a bandwidth of <0.55 Angstrom.
